SKILLS SUMMARY

• Languages: JavaScript (ES5/ES6), Python, C, Typescript, C++, CSS, HTML, JSON and Yaml.

Frameworks: Node.js, Express.js, MongoDB, Vue.js, React.js, Flutter, Next.js, Firebase, GraphQL, MySQL
 Tools: Git, GitLab, Postman, AWS, REST APIs, Linux, Material UI, Docker, Jira, Kubernetes, Azure
 Skills: Front-end, Agile, Back-end, Unit testing, Micro-services, CI/CD, SCRUM, Kanban, DevOps

EXPERIENCE

Full Stack Software Developer - ProsumerGrid

New York, U.S.A

Full-Time

June 2023 - Present

- **Developed**: and designed scalable, distributed, low latency, and high throughput power grid management systems with continuous integration and deployment capabilities. Using React Js(typescript), Docker, AWS Lambda, Postgres SQL and .Net C# Framework as backend.
- **Deployed**: a total of 24 **Map Visualization features** into the PowerGrid, increased animation by **23**%. Designed platform and service architecture using enterprise integration patterns. Using MapBox Js and turf for power flow animations and calculations.
- Optimized: legacy code implementations accelerated software performance by 20%. Scaled products Typescript, React.js, Redux, Flux, esBuild, Mongoose, Docker.

Software Developer - United Health Services

New York, U.S.A

Full-time

February 2022 - May 2023

- Developed: and collaborated with a team of 5 people and enriched existing system metrics by 19%. Increased projected annual revenue by \$1.3 million by implementing optimized business logic through code.
- **Built**: and led design, development, and maintenance of scalable and high-performance products **E2E** from identifying system requirements to software implementation, **testing**, and configuring metrics, alarms, monitors, and dashboards.
- Deployed: and integrated continuous integration and deployment pipeline (CI/CD), performed code review, curated documentation, implemented load/stress testing, and unit/integration/e2e testing.

Software Engineer - Morgan Stanley

Mumbai, INDIA

Full-time

June 2020 - January 2022

- Developed: and designed an Automatic Analysis Tool in C++ and Python, improving testing case efficiency by 50%, and Modern Logging Tools for over 1000 engineers.
- Implemented: Strategic memory allocation policies, reducing system memory usage by 15%.
- Enhanced: Overall software performance by 50% and improved data parsing speeds by 20% and integrated continuous integration and deployment pipeline (CI/CD), performed code review, curated documentation, implemented load/stress testing, and unit/integration/e2e testing.

PROJECTS

Links to all projects are provided as hyperlinks.

- Style Cart (Full Stack, Product) (link): (User base of 2000+) A Virtual shopping basket, enabling customers to browse through an online store, choose products and Shop! Tech: Webpack, Tailwind CSS, React, SCSS, Firebase, Firestore, Node, Express, OAuth, Stripe (May '23).
- TechCrunch News (APIs, Automation) (link): Platform that automatically takes care of Latest Tech at your finger tip, while the user sips the morning green tea. Tech: Redis, React, SQL, AWS lambda, JavaScript and NPM (March '22).
- API Gateway (API, Full stack): An API Gateway to manage requests for a microservices-based application, serving as a single-entry point. Tech: jQuery, Node.js, Express, React, JSON Web Tokens, Redis, Winston, Prometheus, Swagger, AWS, IAM, VPC, Test DrivenDevelopment (TDD), OAuth, Software Development Life Cycle (SDLC) (January '20).
- Vendor Quote Tracking Application (Android, Product)(Paper): A software solution to managing Quote from vendors. Offers analytical, usage statistics, and reminders. Tech: Android Studio, Shell Scripting, Firebase and Firestore (Oct '19).

EDUCATION

Binghamton University (SUNY), Binghamton

New York, U.S.A
